

WordPress Managed Hosting by Wenmark Digital Solutions (WENMARK) takes care of all the details required to keep your WordPress-powered website online and secure. At a rate of \$50/month, we provide web hosting with the following features:

WordPress Core Updates

WordPress Core receives three major updates a year. In addition, each major release receives "dot releases" which are often minor security related updates. Generally, major updates can be performed manually, and "dot releases" happen automatically. However, with WENMARK managing these updates for you, we make sure they are applied in a timely fashion, and we are able to fix your site's code should an update introduce a breaking change*.

WordPress Plugin Updates

WordPress plugins commonly receive frequent updates. Our managed hosting insures these updates are applied in a timely fashion, and we're able to quickly detect and troubleshoot code compatibility problems should they arise.*

Daily File and Database Backups

We backup your website's files and database each day. Therefore, should a "catastrophic" problem arise with your site, we will have a backup on hand to facilitate a quick restore.

*In many cases, breaking changes introduced by WordPress Core and/or plugin updates can be quickly remedied (i.e. in 15 minutes or less). However, in cases where your site's code requires extensive updates in order to maintain compatibility with the latest releases of WordPress and any plugins you utilize, you'll need to pay for any billable time used to update your site's code. These instances are generally rare, and should they occur WENMARK will consult with you on your options and budget before proceeding.

Premium Plugins Include

While you're hosting with WENMARK, we'll provide the following premium plugins and keep them updated with our developer licenses:

- **GravityForms Elite** (\$259/yr value) - advanced form builder with GravityForms
- **Elementor Pro** (\$49/yr value) - intuitive drag-and-drop page builder.
- **Advanced Custom Fields Pro** (\$49/yr value) - enables quick development of advanced WordPress features and capabilities

Secure Server Certificate (SSL)

Your site will be accessible via HTTPS. This ensures that connections to your site are encrypted. This is essential for secure logins, form submissions, and e-commerce. In addition, having your site served over HTTPS is a ranking factor for good SEO.

Web Developer "On Call"

WENMARK is staffed by full-time web developers. Our team is available to help with all aspects of your website, from backend code to frontend presentation.

WENMARK bills at \$100/hr for web development work.

About WENMARK

WENMARK is a service of Michael Wender and his team. Backed by over 20+ years of web development experience, the team at WENMARK provides you with a completely managed hosting environment (from server to website) for your business's online presence. WENMARK can get you online and keep you there by taking care of all the behind the scenes details required to maintain modern websites with a Content Management System (CMS) backend.
